

"Fun on the pedals" is one of 26 panorama routes near Denmark's coastline. Panorama routes are quality cycle routes with places to eat, stay and special places to visit. Views and insights are the keywords for the routes, as they take you to vantage points and special locations in the countryside. The panorama routes are part of the project "Powered by Cycling: Panorama", supported by the EU's regional fund.

Investing in your future

Fun on the pedals

18 km / 24 km

"Fun on the pedals" is all about having fun. It is a tour where children - and grown-up children - are challenged by speed, river storms and flights. The 18 km-long cycle tour takes you through small villages, past the pumping station, go-kart track and the best play areas.

Where the route takes us

You can start the tour anywhere you like but the route described here starts at the tourist information office at Marielyst. You'll find places to eat in Marielyst, but you can also "refuel" on the way at grocery stores in Væggerløse and Marrebæk.

Opposite the Marielyst Tourist Information Office (1) you'll find the tour's first play area with climbing frames, swings and roller coaster without a track! If you don't have your own cycles, they can be hired in the tourist information office.

Drive to Marielyst Strandvej, which later in the summer is abloom with a profusion of sunflowers. The first stop on the tour is at the top of Væggerløse hill - the tour's first and only hill. From here you can expect to be rewarded with unique views over Bredningen to Lolland and the white art museum in Fuglsang. When you have caught your breath, it's time to go exploring in the old Stouby mill dating from 1790. Nearby at the side of the mill you'll find the Stouby glass house (2), where Line has a workshop, shop and exhibition in the charming old Møllegård which is here.

(3) South Falster Solar Park offers fun and educational experiences for the whole family. Learn more about the 966 established collectors, say hello to the sheep and take part in the many activities for children.

"Fun on the pedals" tour continues to the south via the Gedser Landevej. Radbjerg Landevej is a lovely little country road with little traffic where there are fields, countryside and fantastic views over Guldborg Strait and Hasselø. You'll pass Marrebæk canal, where there is the opportunity to fish - remember your fishing licence (can be purchased at Marielyst Tourist Information Office). In Bøtø Nor Gl. pumping station (5) the story of the reclamation of Bøtø Nor and about the flood in 1872 is told. The old steam pump still

operates on selected days. The pumping station's current 6 pumps are set up in the building located behind and together have a pumping capacity of 6,400 litres a second!

The tour continues via Marrebæk (6) to Marielyst Go-Kart (7), where speed is the order of the day. Swap your hard pedals for light pressure on the accelerator. There are karts and tracks for both adults and children, so everyone can take part. You can also buy drinks here.

When you've got the need to speed out of your system, it's time to head for Marielyst or take a detour to the Bøtø bird reserve. The bird reserve is reached by travelling from Bøtø Ringvej, down past Trevlekronevej which opens out onto Lævej. From the bird towers you can observe the rich bird life in the 110 ha large bird reserve. The detour is 6 km.

The next stop is Lupinparken's play area which is in natural surroundings (8), and has climbing frames and mega-swings. Here, children can also use their smartphones to go on a treasure hunt while adults can take a well-earned rest in the large net hammock in the playground. At Larsens play area (9) you can round off the tour with a flight in its super jumper - the trampoline and elastic ropes throw you 8 metres into the air! The play area also has activities for younger children plus a restaurant and bar where you can enjoy a pint.

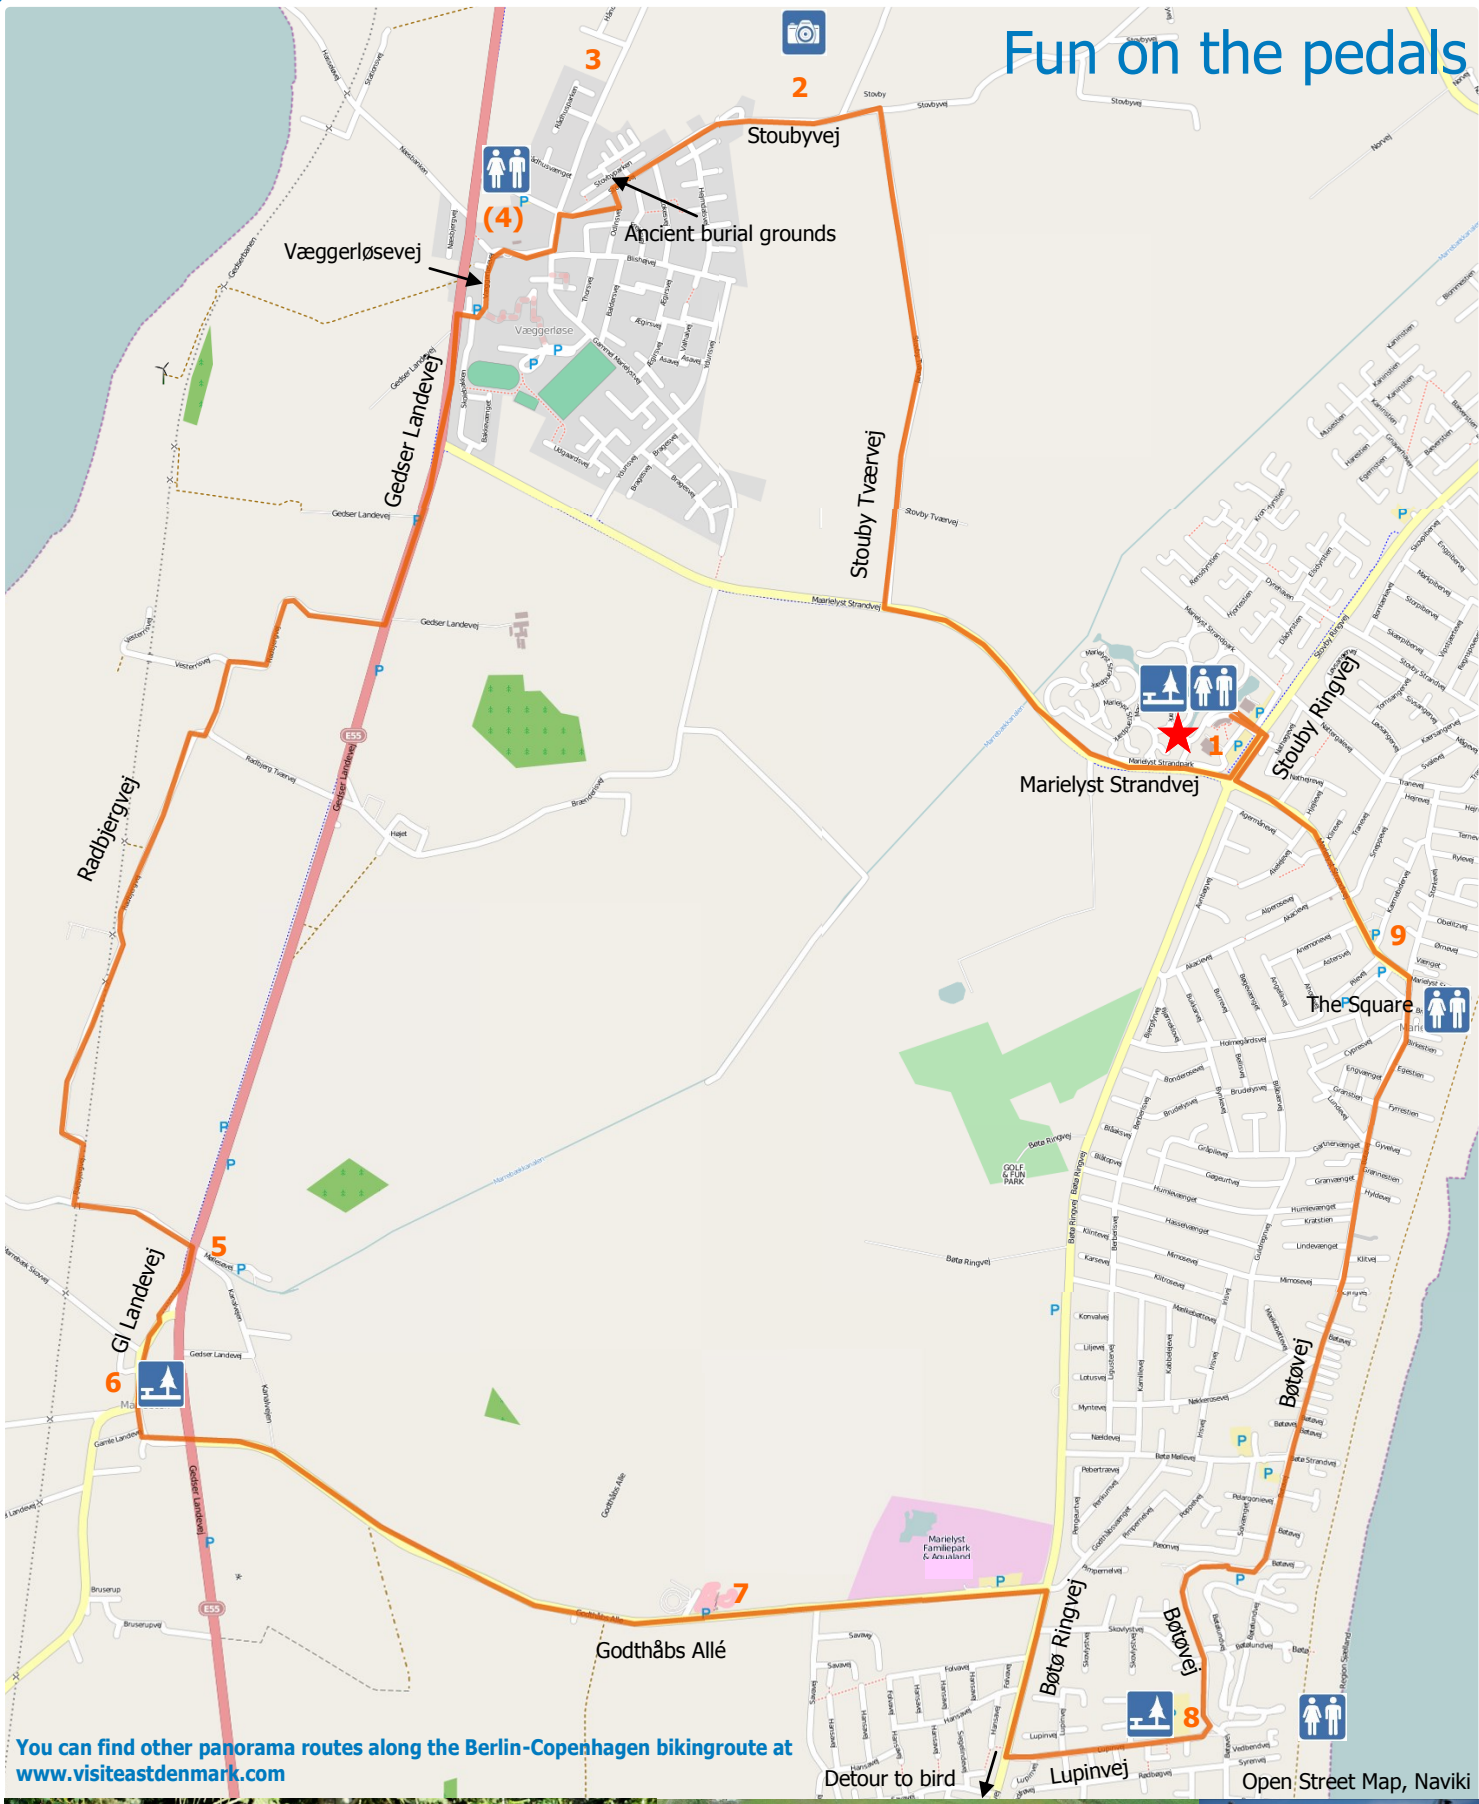

You can also experience

(4) Væggerløse Church with ancient burial grounds

Roads: Small asphalted country roads with moderate traffic. One exception is at Gedser Landevej. Max 2 % gradient
 Cyclotime 11 kmh (adults) app. 1:40 hours
 Cyclotime 8 kmh (kids) app. 2:15 hours
